

Weekly Report 12 Oct 2026

SET Index hovered in a small range and settled at 1577 on Friday. This week, we forecast the market will trade lower in coming week and wane within 1560 – 1590 region. The USD/THB exchange rate closed at 33.53 level on Friday. This week, we forecast the exchange rate will weaken and trade lower within 33.30 – 33.60 range.

Gold spot prices was supported at USD4100 /oz area last week and closed at USD4194 /oz before the weekend. Moving forward, the market is likely to make a recovery this week. We expect the bulls will lead the market trend and trade from USD4150 – 4300 /oz range.

WTI Crude spot prices traded in a recovery sign and closed at USD90.98 /barrel on Friday. This week, we outlook the market will trade higher and move within USD88.00 – 96.00 /barrel region. In our opinion the global production squeeze and the market anxiety on Middle East risk will put a slight upward pressure on oil demand.

Silver spot prices traded in a small range last week and cemented a support at USD59.50 /oz area. This week, the market is likely to rebound and trade from USD59.50 – USD64.50 /oz region. Silver will follow the yellow metal and probably regain in some recovery prices as Dollar tends to make correction.
