

Weekly Report 21 Sep 2026

SET Index traded lower last week and closed at 1584 level on Friday. This week, we forecast the market will trade sideways within 1560 – 1600 region. Breaking beneath the 1560 support will head down to 1520 level. The USD/THB exchange rate settled at 33.29 level on Friday after showing strong resistance at 33.40 area. This week, we foresee the exchange rate will trade lower and trade within 33.00 – 33.40 range.

Gold spot prices traded in a narrow range last week and settled at USD4378 /oz on Friday. This week, we forecast the market will be prone to moderate firm sentiment and trade from USD4300 – USD4500 /oz region. Yellow metal might invite some demand into market due to retreating Dollar towards month-end.

WTI Crude spot prices topped off USD100.00 /barrel level and closed off lower at USD95.26 /barrel on Friday. This week, we foresee the market will trade within USD92.00 – USD100.00 /barrel region. Overall sentiment is still prone to stay resilient due to a softening Dollar in coming week.

Silver spot prices bounced off USD62.50 /oz bottom and settled at USD66.25 /oz before the weekend. This week, we target another rise in market and likely to climb from USD64.00 – USD70.00 /oz region. Commodity markets will return in favor by traders in September as a hedge to general inflation.
