

Weekly Report 30 Mar 2026

SET Index closed at 1447 on Friday after gradual rise throughout last week. This week, we predict the SET market will fall due to regional selling sentiment in stock markets. Hence, we target the SET market will trade lower within 1460 – 1380 region. The USD/THB exchange rate settled at 32.64 on Friday. This week, we foresee the exchange rate market will drop in value as Dollar may recede. Range is target at 32.00 – 32.80 region.

Gold spot prices have held support at USD4380 /oz area and settled higher at USD4492 /oz before the weekend. This week, the market will likely whipsaw and engage swinging actions within USD4300 – USD4600 /oz region. Traders are reminded to be cautious of the wild prices ahead of uncertainty.

Crude WTI spot prices bounced off USD84.00 /barrel bottom and settled at USD92.04 /barrel before weekend. This week, we forecast the market will climb higher due to escalating war tension in Middle East. Range is target at USD88.00 – USD100.00 /barrel amid rising demand. However, breaking beneath the USD88.00 /barrel support needs to practice caution in long positions.

Silver spot prices reversed up from USD61.00 /oz last week and closed at USD69.78 /oz on Friday. This week, we aim for a technical recovery and foresee the trend will trade from USD65.00 – USD75.00 /oz region. Market interest will gradually return to Silver market for short-covering but traders are reminded for observing risk.
