

Weekly Report 5 Oct 2026

SET Index fell as we forecast last week. Thai blue-chip index settled at 1571 on Friday. This week, we target the market will trade lower within 1540 – 1580 region. However, the unexpected trust above 1580 resistance will lift the market back to 1600 area. The USD/THB exchange rate traded in mild strength and settled at 33.53 level on Friday. This week, we foresee the exchange rate will fall and trade within 33.20 – 33.60 region.

Gold spot prices found a support at USD4120 /oz region and settled at USD4142 /oz on Friday. This week, we predict the market will make a technical recovery from USD4120 – USD4200 /oz range. However, traders need to observe the support at USD4120 /oz level that is essential to safeguard an upward reversal. Closing below USD4120 /oz level needs to abandon your long-view for the time being.

WTI Crude spot prices traded in in a tight range as we predicted last week. Market closed at USD90.33 /barrel before the weekend. Moving forward, we target the market will trade and consolidate within USD88.00 - USD95.00 /barrel region. We presume the market will eventually break beyond this range in either direction based on the fundamentals of U.S. mid-term election and progressive situation of U.S. – Iran war.
